

## Supplementary appendix

This appendix formed part of the original submission and has been peer reviewed.  
We post it as supplied by the authors.

Supplement to: GBD 2019 Blindness and Vision Impairment Collaborators on behalf of the Vision Loss Expert Group of the Global Burden of Disease Study. Causes of blindness and vision impairment in 2020 and trends over 30 years, and prevalence of avoidable blindness in relation to VISION 2020: the Right to Sight: an analysis for the Global Burden of Disease Study. *Lancet Glob Health* 2020; published online Dec 1. [http://dx.doi.org/10.1016/S2214-109X\(20\)30489-7](http://dx.doi.org/10.1016/S2214-109X(20)30489-7).

## **APPENDIX: SUPPLEMENTARY RESULTS**

### **Contents**

Table 1A. Cases and age-standardized prevalence in 2020 for blindness by cause, and percent change from 1990 to 2020 (all ages)

Table 1B. Cases and age-standardized prevalence in 2020 for moderate and severe vision impairment by cause, and percent change from 1990 to 2020 (all ages)

Table 2A. Aged 50+ crude prevalence (per 1000 people) by cause and severity in 2020.

Table 2B. All age crude prevalence (per 1000 people) by cause and severity in 2020.

Table 3. Change in all-age, crude prevalence in 2010-2019 to assess the success of the World Health Assembly's global action plan to reduce avoidable vision impairment.

Figure 1. Coverage of data sources (1980-2018) with cause-specific vision impairment prevalence data for cataract, age-related macular degeneration, glaucoma and diabetic retinopathy (coverage is presented as numbers of sources per region).

Figure 2. Change in regional age-standardized prevalence of moderate and severe vision impairment between 1990 and 2020 by cause
