Video: Demonstration of the user interface and image quality of the Tegos system (reduced image quality for practicability purposes). Exemplary transmission of an angiography screen with pre-recorded roadmap loops, displaying an aneurysm with a WEB device and the probing of an aneurysm with a guide wire (Excelsior SL10, Stryker, Kalamazoo, MI; Traxcess 14, MicroVention, Aliso Viejo, CA). In the final section of the video, the preparation of a WEB device is shown (SLS6, 6 x 4.6 mm, MicroVention, Aliso Viejo, CA). The footage does not originate from the cases presented in this report.

Figure: Screenshots related to the attached video (see description above). Upper left: Probing of an aneurysm with a guide wire. Upper right: Aneurysm with a WEB device. Bottom: Preparation of a WEB device. The footage does not originate from the cases presented in this report.
