

Supplemental Information

YAP/TAZ Activation Drives Uveal Melanoma

Initiation and Progression

Huapeng Li, Qi Li, Kyvan Dang, Shan Ma, Jennifer L. Cotton, Sun Yang, Lihua J. Zhu, April C. Deng, Y. Tony Ip, Randy L. Johnson, Xu Wu, Claudio Punzo, and Junhao Mao

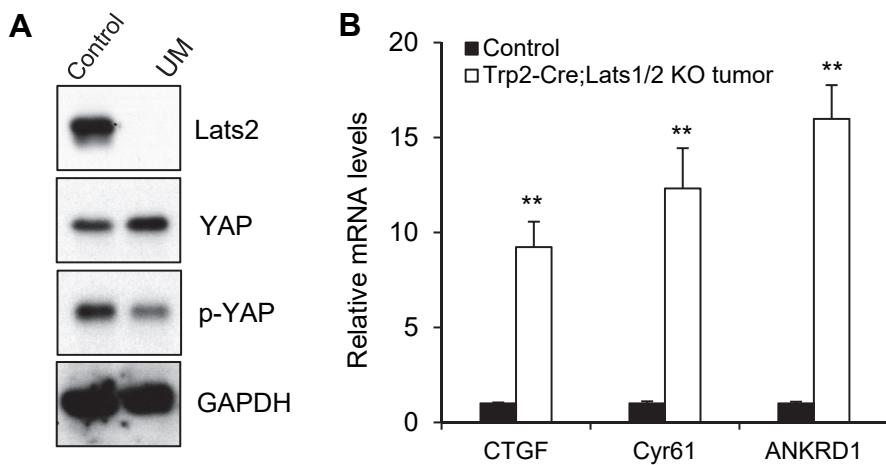

Figure S1 (Related to Figure 2). Lats2 and YAP expression and YAP-mediated transcriptional activity in UM from AAV5-Trp2-GFPCre; Lats1/2 KO mice.

(A) Immunoblot analysis of protein expression of Lats2, YAP, p-YAP and GAPDH in control tissues and AAV5-TRP2-GFPCre; Lats1/2 KO UMs using the antibodies against Lats2, p-YAP, YAP and GAPDH. (B) qPCR analysis of mRNA levels of *CTGF*, *Cyr61*, and *ANKRD1* in control and UM tissues. Data are mean \pm S.D., ** = p value ≤ 0.01 .

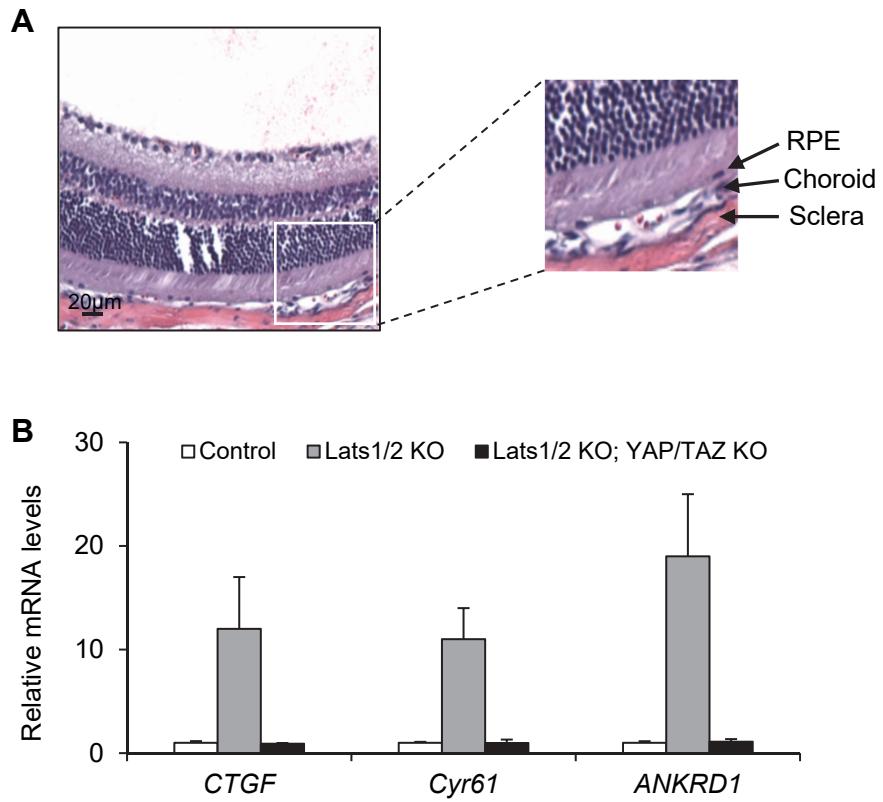

Figure S2 (Related to Figure 3). YAP and TAZ are required for UM genesis induced by Lats1/2 deletion.

(A) Representative histological images of the uveal tract in *AAV5-CMV-Cre;Lats1^{f/f};Lats2^{f/f};YAP^{f/f};TAZ^{f/f}* (6 months after Cre injection) mice. (B) qPCR analysis of mRNA levels of *CTGF*, *Cyr61*, and *ANKRD1* in uveal tract tissues from control and *AAV5-CMV-Cre;Lats1^{f/f};Lats2^{f/f};YAP^{f/f};TAZ^{f/f}* (*Lats1/2 KO*, *YAP/TAZ KO*) mice as well as UM from *AAV5-CMV-Cre;Lats1^{f/f};Lats2^{f/f}* (*Lats1/2 KO*) mice.

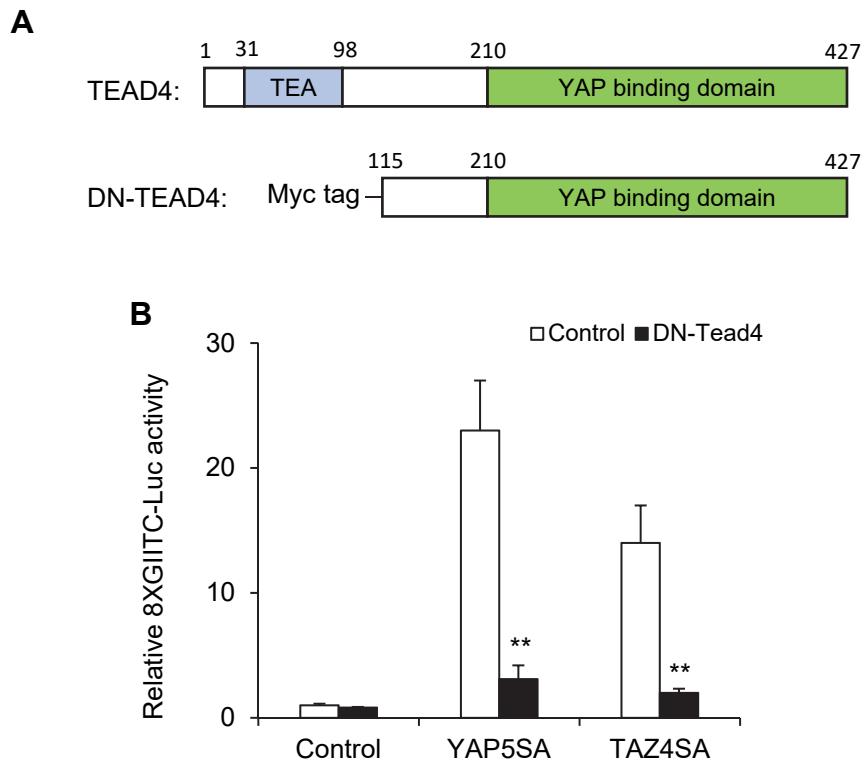

Figure S3 (Related to Figure 4, 6, 7). DN-TEAD4 inhibits YAP and TAZ induced downstream gene transcription.

(A) Schematic diagrams of TEAD4 and DN-TEAD4. DN-TEAD4 retains the entire YAP binding domain and carries a N-terminal myc tag. (B) The activity of TEAD-dependent 8XGIIITC-Luc reporter in HEK293T cells expressing the activated forms of YAP (YAP5SA) or TAZ (TAZ4SA) with or without co-expression of DN-TEAD4. Data are mean \pm S.D., ** = p value ≤ 0.01 .

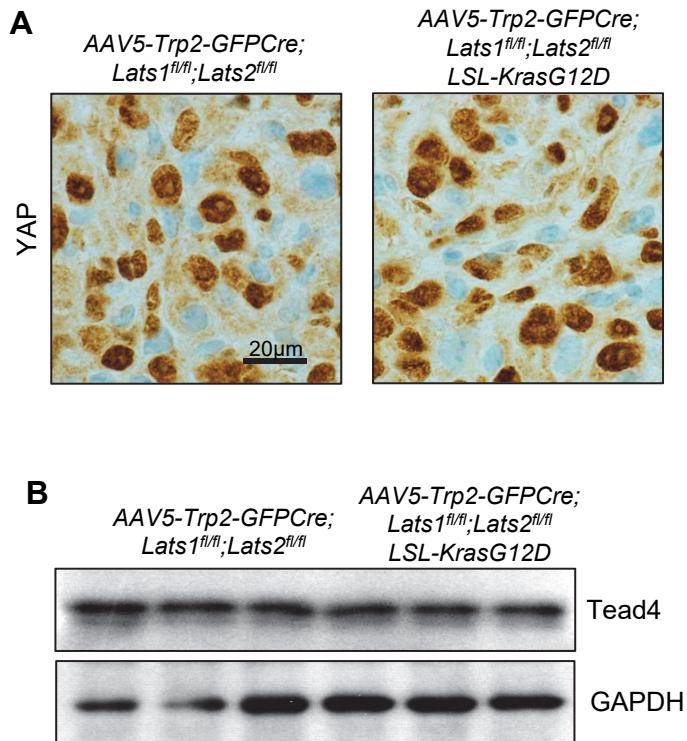

Figure S4 (Related to Figure 5). YAP and TeaD4 expression in UM with Lats1/2 deletion and Kras activation.

(A) Immunohistochemistry of YAP showing YAP nuclear localization in UMs from $AAV5\text{-}Trp2\text{-}GFPCre;Lats1^{\text{fl/fl}};Lats2^{\text{fl/fl}}$ and $AAV5\text{-}Trp2\text{-}GFPCre;Lats1^{\text{fl/fl}};Lats2^{\text{fl/fl}};LSL\text{-}Kras^{G12D}$ mice.

(B) Immunoblot analysis of Tead4 expression in UMs from $AAV5\text{-}Trp2\text{-}GFPCre;Lats1^{\text{fl/fl}};Lats2^{\text{fl/fl}}$ and $AAV5\text{-}Trp2\text{-}GFPCre;Lats1^{\text{fl/fl}};Lats2^{\text{fl/fl}};LSL\text{-}Kras^{G12D}$ mice.

Table S2 (Related to STAR Methods). RT-qPCR and ChIP-qPCR Primers

qPCR Primers	Sequence
mouse CTGF forward	TGTGCACTGCCAAAGATGGTGCAC
