

Figure S1. The efficiency of miR-15a-5p mimics and oe-HMGA1. (A) The miR-15a-5p mimics significantly increased the expression level of miR-15a-5p in T24 and UM-UC-3. (B and C) The oe-HMGA1 significantly increased the mRNA and protein expression level of HMGA1 in T24 and UM-UC-3. **P<0.01.
