

**Figure S4 Effect of pyrimethamine on the plasma concentration-time profiles and urinary excretion of pyridoxic acid (PDA)**

Plasma concentrations and amount excreted into the urine of pyridoxic acid (PDA) were determined.  $AUC_p$  and  $CL_r$  were calculated as described in the Methods, and shown in Box-and-Whisker plot. Geometric mean and 90% confidence of intervals of AUC ratio and  $CL_r$  ratio were cited from Table 1.
