STROBE Statement—Checklist of items that should be included in reports of *cross-sectional studies* 

	Item No	Recommendation	Page No; Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in	Page 1
		the title or the abstract	D 2
		(b) Provide in the abstract an informative and balanced	Page 2
		summary of what was done and what was found	
Introduction			D 2.5
Background/rationale	2	Explain the scientific background and rationale for the	Page 3-5;
Objectives		investigation being reported	Paragraph: 1-6
	3	State specific objectives, including any prespecified	Page 5;
		hypotheses	Paragraph: 6
Methods			
Study design	4	Present key elements of study design early in the paper	Page 5;
			Paragraph: 7
Setting	5	Describe the setting, locations, and relevant dates, including	Page 5;
		periods of recruitment, exposure, follow-up, and data collection	Paragraph: 7
Participants	6	(a) Give the eligibility criteria, and the sources and methods of	Page 5-6;
		selection of participants	Paragraph: 8
Variables	7	Clearly define all outcomes, exposures, predictors, potential	Page 5-7;
		confounders, and effect modifiers. Give diagnostic criteria, if	Paragraph: 8-10
		applicable	
Data sources/	8*	For each variable of interest, give sources of data and details	Page 5-7;
measurement		of methods of assessment (measurement). Describe	Paragraph: 9 - 10
		comparability of assessment methods if there is more than one	
		group	
Bias	9	Describe any efforts to address potential sources of bias	Page 6;
			Paragraph: 10
Study size	10	Explain how the study size was arrived at	Page 6;
			Paragraph: 10
Quantitative variables	11	Explain how quantitative variables were handled in the	Page 6-7;
		analyses. If applicable, describe which groupings were chosen	Paragraph: 11
		and why	
Statistical methods	12	(a) Describe all statistical methods, including those used to	Page 7-8;
		control for confounding	Paragraph: 12-14
		(b) Describe any methods used to examine subgroups and	Page 7-8;
		interactions	Paragraph: 12-14
		(c) Explain how missing data were addressed	Page 7-8;
			Paragraph: 12-14
		(d) If applicable, describe analytical methods taking account	Page 7-8;
		of sampling strategy	Paragraph: 12-14
		$(\underline{e})$ Describe any sensitivity analyses	Page 7-8;
			Paragraph: 12-14
Results			<b>I</b>
Participants	13*	(a) Report numbers of individuals at each stage of study—eg	Page 8;
		numbers potentially eligible, examined for eligibility,	Paragraph:15

		confirmed eligible, included in the study, completing follow- up, and analysed	
		(b) Give reasons for non-participation at each stage	No applied
		(c) Consider use of a flow diagram	No applied
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	No applied
		(b) Indicate number of participants with missing data for each variable of interest	No applied
Outcome data	15*	Report numbers of outcome events or summary measures	Page 8; Paragraph:15
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder- adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 9-13 Paragraph:15-18
		(b) Report category boundaries when continuous variables were categorized	No applied
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	No applied
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	No applied
Discussion			
Key results	18	Summarise key results with reference to study objectives	Page 13; Paragraph: 19
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 18; Paragraph: 35
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 13-18; Paragraph: 19-36
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 17-18; Paragraph: 31-35
Other information			
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	No applied

<sup>\*</sup>Give information separately for exposed and unexposed groups.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
