

Fig. S2. PVR/CD155 was identified as a candidate molecule directly interacting with JAM-A. (A) The expression of PVR/CD155 and ARHGEF1 was increased by transfection of an N-terminal 3xFLAG-tagged JAM-A plasmid in JAM-A KO-B cells. (B) Immunoprecipitation (IP) assay. PVR/CD155 was detected in immunoprecipitation with an anti-FLAG antibody from N-terminal 3xFLAG-tagged JAM-A-expressing JAM-A KO-B cells.
