

Appendix 1.

Focus group and interview questions

Questions used in focus groups and interviews
1. <i>How able do you feel currently to change your practice regarding sensory assessment and treatment?</i>
2. <i>What do you think some of the challenges will be in using new assessment and treatment approaches?</i>
3. <i>What do you see as some of the strengths of this organisation in supporting your use of new sensory assessments and treatments?</i>
4. <i>How do you feel about the prospect of changing the way you assess and treat sensory loss?</i>
5. <i>Do you think the working environment (i.e. either cultural / physical) will impact on your ability to use new assessment and treatment approaches?</i>
6. <i>What are the incentives for you currently, if any, to change your practice in the areas of sensory rehabilitation?</i>
7. <i>Do you think a change in practice in the area of sensory assessment and treatment will have a positive effect on patient outcomes?</i>
