

Figure Legend

(A) Western blot assay of IL1RAP expression in Con, Sparstolotin (Spa.) and JSH-23 group in vivo, (B) Quantification assay for IL-1RAP in different groups. (C) Western blot assay of IL1RAP expression in Con, IL-1RAP-shRNA, Spa. and JSH-23 group in vivo, (D) Quantification assay for IL1-RAP in different groups. Protein levels were normalized to β -actin. (Con vs. others, $*P < 0.05$, $n = 6$ per group, all data was represented as Mean \pm Standard error).
