germination speed index	GSI		
germination index	GI		
response index	RI		
synthetic allelopathy	SE		

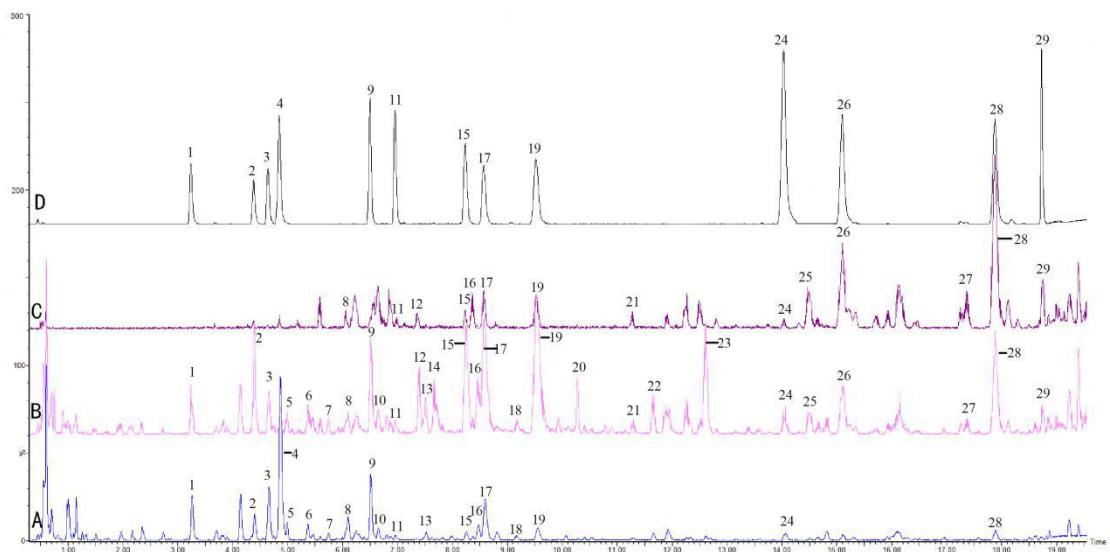

Figure 1 The fingerprint of different solvent extracts of *A. argyi* in UPLC-Q-TOF-MS. (A)the water-soluble extract, (B) the 50% ethanol extract, (C) the pure ethanol extract, (D) the standard substance. The mass spectrometry data such as total ion chromatograms, molecular ion peaks and secondary fragment ions were collected by Masslynx 4.1 software and processed with ProGenesis QI V2.0 (Waters Corp., Milford, USA).
