

Figure S5. Distribution and collinearity of *PEBP* family genes within genomes of nine *Rosaceae* species. Species include (a) *M. domestica*, (b) *Pyrus communis*, (c) *R. occidentalis*, (d) *P. armeniaca*, (e) *P. persica*, (f) *P. dulcis*, (g) *P. yedoensis*, (g) *P. mume*, (h) *P. avium*. Syntenic blocks containing *PEBP* gene members were connected with colored lines.
