

**SUPPLEMENTARY FIGURE**

**Supplementary Figure 1. The difference in SCAMP1 and SCAMP5 between early stage and late stages as diagnosis markers.** (A, B) The significant difference in SCAMP1 ( $p < 0.05$ ) and SCAMP5 ( $p < 0.05$ ) between early stage (Stage I + II) and late stages (Stage III + IV) as diagnosis markers. (C, D) The difference in SCAMP1 ( $p > 0.05$ ) (C) and SCAMP5 ( $p < 0.05$ ) (D) between early stages (Stage I + IIa) and late stages (Stage II b + III + IV). The Area Under the Curve (AUC) metrics are also provided for SCAMP1 and 5 to predict diagnosis in PAAD by Medcalc.
