

Fig. S1

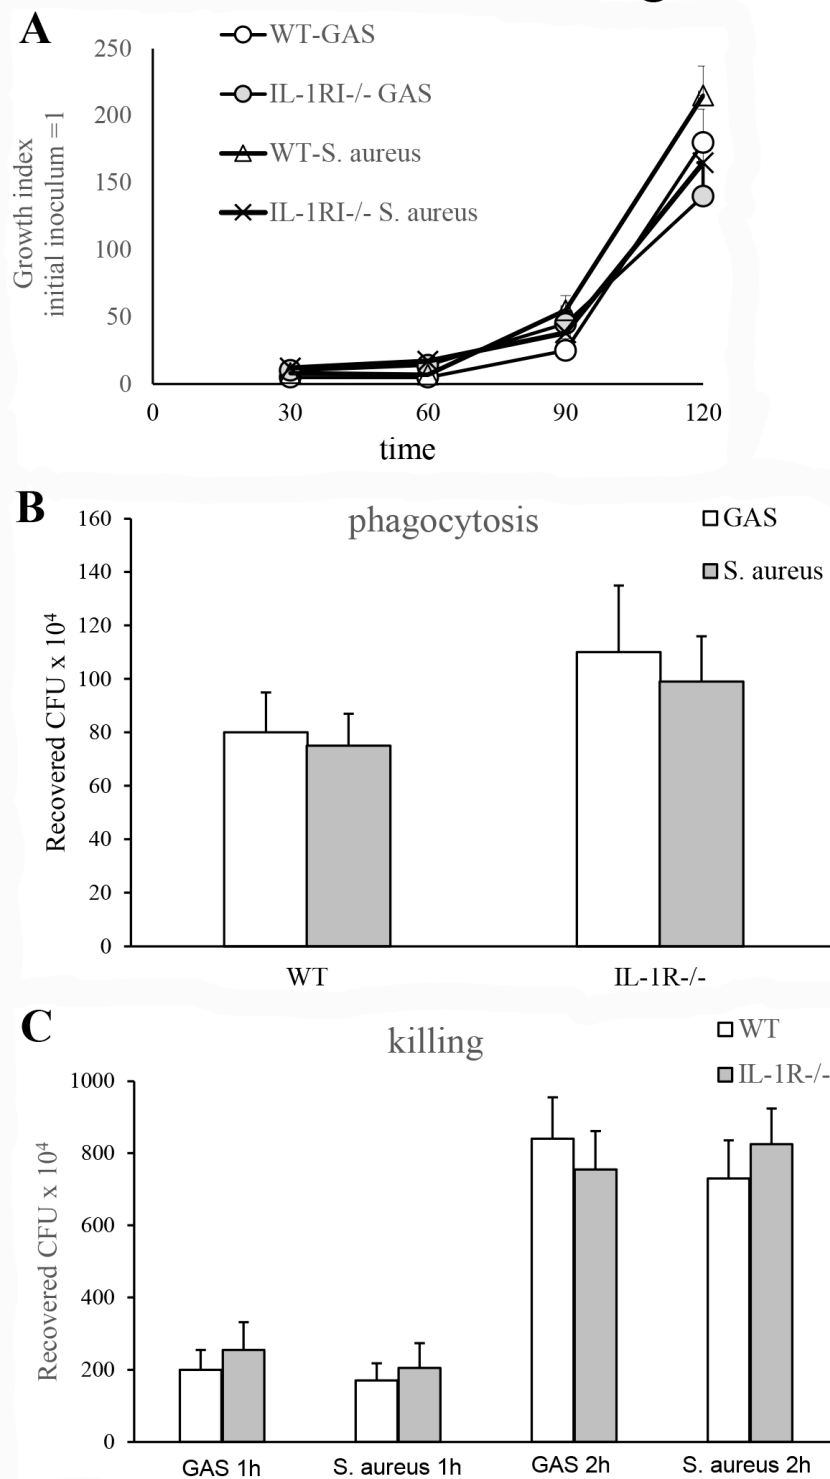

Figure S1. IL-1 signaling has no effect on phagocytosis and killing of GAS or *S. aureus*. (A), Whole blood (0.2 ml) from WT or IL-1RI KO mice was infected with 2×10^4 GAS or *S. aureus* and bacteria were enumerated at the time points indicated after incubation at 37°C. Phagocytosis (B) and killing (C) of GAS or *S. aureus* by bone marrow derived macrophages from WT and IL-1RI-deficient mice are also shown. Data are expressed as means \pm standard deviations of triplicate observations, each from a different experiment.
