

Supplementary data

Supplementary figure 1

Figure S1: Endoglin heterozygous macrophages secrete more MCP-1 compared to wild type cells. MNC cells were cultured for 24 hours after which the amount of MCP-1 present in the medium was determined using an ELISA assay. ELISA for MCP-1 on cell-free supernatants was carried out with the MCP-1 kit from Antigenix (catalog#RRF423CK) following the manufacturer's instructions. * p < 0.05.
