

## Certificate of Translation

On behalf of the Voluntary Translation of Informative Materials related to COVID-19 Project at the Federal University of Bahia, we inform that the research article “**Artificial neural networks for short-term forecasting of cases, deaths, and hospital beds occupancy in the COVID-19 pandemic at the Brazilian Amazon**” was translated into English by our team of training translators. We also inform that, as it is a pedagogic project, the text was closely supervised and revised by the professors responsible for the project.
