

Figure 1. Number of antibiotic prescriptions per 100,000 beneficiaries for dental public health dentists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

Figure 2. Number of antibiotic prescriptions per 100,000 beneficiaries for endodontists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

eFigure 3. Number of antibiotic prescriptions per 100,000 beneficiaries for general dentists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States. General dentists were included for comparison purposes.

eFigure 4. Number of antibiotic prescriptions per 100,000 beneficiaries for orthodontists, fit by using locally weighted scatterplot smoothing regression, from January 2013 through December 2015, United States. This category includes orthodontics and dentofacial orthopedics.

eFigure 5. Number of antibiotic prescriptions per 100,000 beneficiaries for oral and maxillofacial pathologists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

eFigure 6. Number of antibiotic prescriptions per 100,000 beneficiaries for oral and maxillofacial radiologists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

eFigure 7. Number of antibiotic prescriptions per 100,000 beneficiaries for oral and maxillofacial surgeons, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

eFigure 8. Number of antibiotic prescriptions per 100,000 beneficiaries for pediatric dentists, fit by using locally weighted scatterplot smoothing regression, from January 2013 through December 2015, United States.

eFigure 9. Number of antibiotic prescriptions per 100,000 beneficiaries for periodontists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.

eFigure 10. Number of antibiotic prescriptions per 100,000 beneficiaries for prosthodontists, fit by using quasi-Poisson regression, from January 2013 through December 2015, United States.
