

## **SUPPLEMENTAL INFORMATION**

Supplemental Information includes four figures and tables.

### **Supplementary Data**

**Supplementary Figure 1:** Representative figures showing the expression of individual markers in example DCIS cases.

**Supplementary Figure 2:** Kaplan Meier plots of entire patient group (n=135) and study cohort included in the MxIF and outcome analysis (n=51).

**Supplementary Figure 3:** Correlation plots for all cell biomarker data in tumor and stroma.

**Supplementary Figure 4:** Violin plots showing the association between marker expression and BCE.

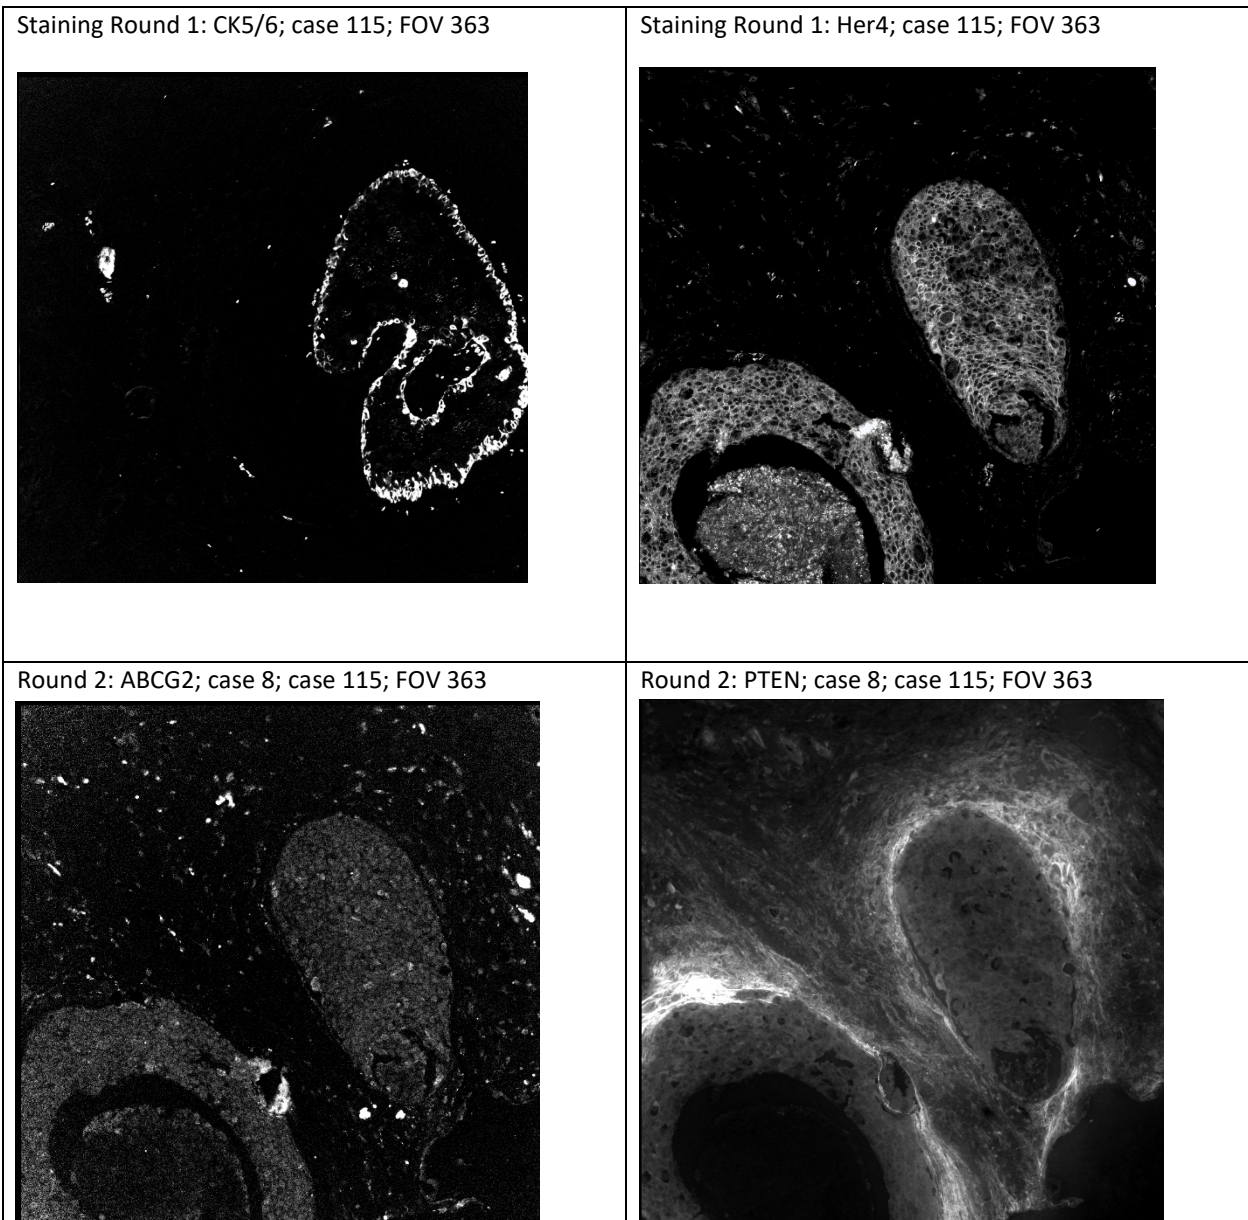

**Supplementary Table 1.** Clinical Demographic Summary

**Supplementary Table 2:** Antibodies, Clone, and Conjugate Information

**Supplementary Table 3:** Details of the antibodies and the round of staining used for each marker during the MxIF staining.

**Supplementary Table 4:** Detailed stepwise flow chart of the analysis and the filters used in the study.

## Supplementary Table 1. Demographic and Treatment Summary of DCIS patients

|   | Entire Cohort (n=135)    | Study Cohort (n=51)     |
|---|--------------------------|-------------------------|
| Age (years)                                   | 32 – 75 (median = 55)    | 34 – 75 (median = 55)   |
| Year of diagnosis                             | 1986 – 2004              | 1986-1999               |
| DCIS grade<br>(High/Moderate/Low/unknown)     | 65/44/19/7               | 26/18/7                 |
| Size of DCIS (cm)                             | 0.4 – 9.5 (median = 1.6) | 0.6 – 9.5 (median = 2)  |
| Estrogen receptor status<br>(pos/neg/unknown) | 20/13/102                | 13/8/30                 |
| Follow up time (years)                        | 0.3– 17 (median = 8)     | 0.8 – 17 (median = 8)   |
| Recurrent Patients (years)                    | 0.8 – 15 (median = 3)    | 0.8 – 8 (median = 2.5)* |
| Non-recurrent Patients (years)                | 0.3 – 17 (median = 9)    | 5 – 17 (median = 9)**   |
| Hormone Therapy                               | 44                       | 22                      |
| Radiation Therapy                             | 22                       | 13                      |
| Hormone and Radiation<br>Therapy              | 14                       | 8                       |
| Breast Cancer event (BCE)                     | 39 (29%)                 | 13 (25%)                |
| In situ                                       | 15 (11%)                 | 5 (10%)                 |
| Ipsilateral invasive                          | 15 (11%)                 | 6 (12%)                 |
| Contralateral invasive                        | 5 (4%)                   | 1 (2%)                  |
| Metastatic                                    | 4 (3%)                   | 1 (2%)                  |

\*Excludes patients with BCE > 10 yrs; \*\*Excludes patients with no BCE < 3 yrs
