On-Line Table: Multivariable logistic regression model: association of different levels of CDS with good outcome[a]

CDS Level	OR[b]	95% CI[c]	P Value
1	0.497	0.256–0.966	.039
2	0.356	0.181–0.700	.003
3	0.132	0.035–0.490	.002

[a] In this model, the CDS is naturally coded (thus CDS = 0 is omitted) and the ORs for each level (CDS = 1–3) are in reference to CDS = 0.
[b] OR for good outcome.
[c] 95% CI for the OR.
