Supplementary Figure S1. **Scatterplot of cyclophosphamide equivalent dose (CED) by anti-Müllerian hormone (AMH).** Scatterplot of cyclophosphamide equivalent dose (CED, in mg/m^2) by anti-Müllerian hormone (AMH in µg/l) in the discovery DCOG-Later VEVO cohort, displaying the outliers in CED score. All n = 285 were included in the linear regression analyses, survivors with reduced ovarian function and survivors without reduced ovarian function were included in the logistic regression models and are depicted in colour.
