

Figure S1. hsa_circ_0072309 overexpression inhibits the proliferation of gastric cancer cells via the peroxisome proliferator-activated receptor γ -dependent PTEN pathway. The viability of AGS cells in the six groups (control, Oe-circ_0072309, Oe-circ_0072309 + pioglitazone, Oe-circ_0072309 + GW9662, pioglitazone + GW9662, Oe-circ_0072309 + pioglitazone + GW9662) was determined using Cell Counting Kit-8 assays. * $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$. circ, circular RNA; Oe, overexpression vector.
