

Figure S1. Cell viability following the treatment with C5E and/or gemcitabine. PANC-1 cells were treated with (A) C5E, (B) gemcitabine and C5E and (C) gemcitabine for 72 h. Data are expressed as the mean  $\pm$  SEM from  $\geq 3$  independent experiments. \* $P < 0.05$ , \*\* $P < 0.01$  vs. control.
