

S4 Fig. Western blot of Ppn1 N-terminal truncation mutants. Whole-cell extracts from wild-type *ppn1*-(1-710), *ppn1*Δ, and the indicated *ppn1* truncation strains growing logarithmically at 30°C were resolved by SDS-PAGE and subjected to Western blotting with polyclonal Ppn1 antibodies. The positions and sizes (in kilodaltons) of marker polypeptides are indicated at left.
