

S1 Fig. Proportion of the total NABs to each serotype contributed by TS NABs after (A) TDV vaccination and (B) DENV1 or DENV2 primary infection in humans. The levels of TS nAbs measured in figure 2B are expressed here as the % of the total nAbs shown in figure 2A. (A) Vaccinated subjects; (B) Subjects with primary infection. The horizontal bar represents the mean percentage of TS nAbs with 95% CI.
