

Supplementary Table 1. Mean recovery of symmetric dimethylarginine (SDMA) from duplicate immunoassay measurement of SDMA concentration in 3 equine serum samples spiked with an additional 10, 40, or 80 $\mu\text{g/dL}$ of SDMA.

SDMA spike concentration	spike recovery %	mean recovery %
low (10 $\mu\text{g/dL}$)	128%	113%
	99%	
	113%	
medium (40 $\mu\text{g/dL}$)	106%	105%
	106%	
	105%	
high (80 $\mu\text{g/dL}$)	114%	110%
	105%	
	109%
