Title: Brain Angiotensin II in dopaminergic-imbalance pathologies: neuroinflammation and vascular responses

Reviewer's Name: Komal Kalani

Reviewer's country: USA

Date sent for review: 2020-4-7

COMMENTS TO AUTHORS

The article "Brain Angiotensin II in dopaminergic-imbalance pathologies: neuroinflammation and vascular responses describes the role of brain angiotension in dopaminergic-imbalance pathology. The review article is too short that it is unable to cover the important literature properly. The figure given is not worth as it doesn't represent anything; however, any mechanistic schematic figure would justify the article. Also, a table of drugs and related work summary would concise the review.
