Supplemental Figure 1. Participation rates for the Mayo Clinic Serology Screening Program

This figure reports the participation rates of healthcare personnel in the Mayo Clinic Serology Screening Program. Panel A reports the overall participation rate of the 81,113 healthcare personnel studied. Panel B breaks the results down by the participant's home state. Panels C and D break the results down by age groups and sex, respectively. Percentages reported in each bar is the observed participation rate. For each category, the total sample size is also given.
