

SUPPLEMENTAL FIGURE LEGENDS

Supplemental Figure 1. Vascular A β deposition in brain tissue from AD patients. Double staining with ThS (green) and anti-SMA antibody (red) confirm the absence of vascular A β deposits in brain samples from patients AD60129 (A-C) and AD60068 (G-I). Vascular A β was rare in sample AD60649 (G-I) (a single event in all brain slices analyzed) and abundant in patient AD51486 (J-L). Scale bar in L depicts 50 μ m and applies to all panels.
