

Supplemental Table for:
 Clinical Application of the FoundationOne CDx Assay to Therapeutic Decision-Making for Patients with Advanced Solid Tumors
 Masayuki Takeda et al.

Supplementary Table S1. Success rate of genome profiling and TMB according to tumor specimens

Tissue source	Success of genomic testing (n = 175)		Failure of genomic testing (n = 6)		Excluded tumors before processing for genomic profiling (n = 11)
	Genome profiling	TMB	Genome profiling	TMB	
Surgery	111/111 (100%)	97/111 (87%)	0/4 (0%)	0/4 (0%)	1
Biopsy/Cell block					
≥20% tumor cell	58/58 (100%)	53/58 (91%)	0/1 (0%)	0/1 (0%)	4
<20% tumor cell	6/6 (100%)	3/6 (50%)	0/1 (0%)	0/1 (0%)	6

Abbreviations not defined in text: TMB, tumor mutation burden
