Table S1 Relationship between Peritumoral CT Feature and pathological invasiveness of GGNs

Peritumoral CT Feature	non-invasive lesions (n=376)	invasive lesions (n=311)	p
Margin			<0.001
Smooth	349	205	
Lobular or spiculated	30	106	
Nodule-lung interface			0.035
Well defined	312	238	
Ill defined	64	73	
Pleural indentation			<0.001
Yes	17	60	
No	359	251	
Peritumoral emphysema			0.072
Yes	14	21	
No	362	290
