

## Data Sharing Statement

<b>Article Info</b>	http://dx.doi.org/10.21037/jtd-20-3123.	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data in particular will be shared, and we also found high CRP levels predicted a lack of response to treatment in patients with advanced lung adenocarcinoma with or without EGFR mutations.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the survival date may be updated over time.
7	To whom will you share the data?	Medical oncologists
8	For what type of analysis or purpose?	For analysis to evaluate the clinical utility of C-reactive protein (CRP) levels measured at the time of diagnosis in advanced lung adenocarcinoma.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: takamasa@med.shimane-u.ac.jp
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
