

(A) *Psychromonas* OTU 4

(B) *Psychrilyobacter* OTU 5

Supplementary Figure S7. Presence and relative abundances of *Psychromonas* OTU 4 (A) *Psychrilyobacter* OTU 5 (B) related sequences (>97%) in publically available 16S rRNA gene datasets, as determined by IMNGS analyses (see Materials and Methods). Additional samples from Svalbard that were determined in this study, are also included.
