

Figure S1 Kaplan-Meier curves showing overall survival and progression-free survival by NLR and PLR. Curves showed overall survival by NLR (A), PLR (B). Curves showed progression survival by NLR (C), PLR (D).

NLR, neutrophil-to-lymphocyte ratio; PLR, platelet-to-lymphocyte ratio.

Figure S2 The correlation between indicators and prognosis in nonsmoking female lung cancer patients

** : There was a significant correlation at the 0.01 level (bilateral); * : There was a significant correlation at the 0.05 level (bilateral).

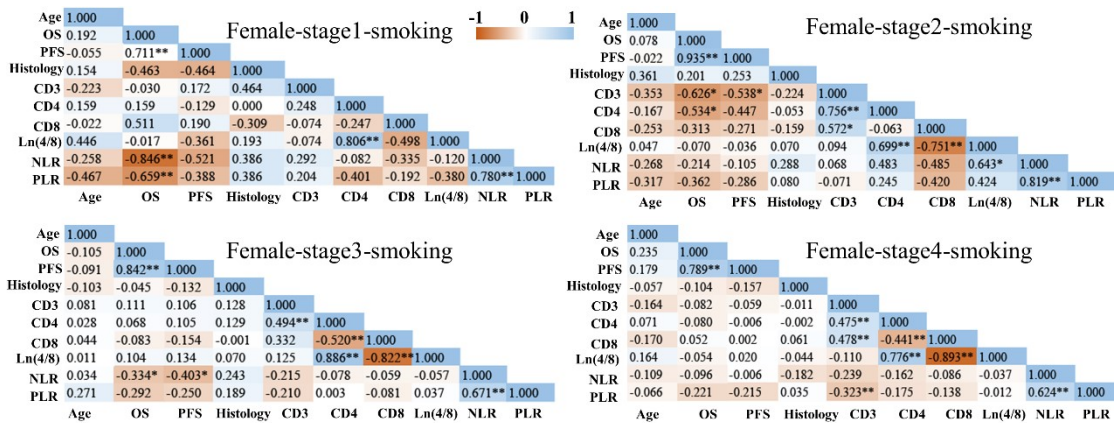

Figure S3 The correlation between indicators and prognosis in smoking female lung cancer patients

** : There was a significant correlation at the 0.01 level (bilateral); * : There was a significant correlation at the 0.05 level (bilateral).

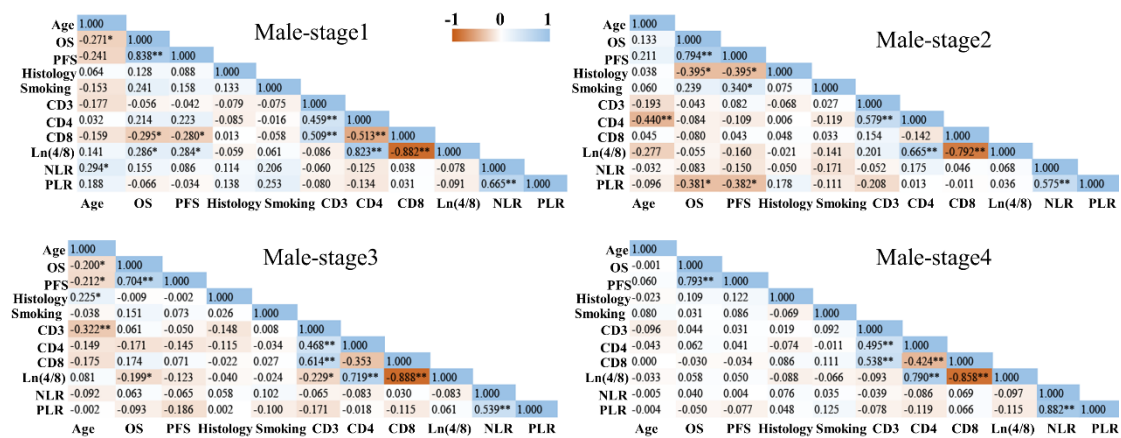

Figure S4 The correlation between indicators and prognosis in male lung cancer patients

** : There was a significant correlation at the 0.01 level (bilateral); * : There was a significant correlation at the 0.05 level (bilateral).
