## **Reporting Summary**

Nature Research wishes to improve the reproducibility of the work that we publish. This form provides structure for consistency and transparency in reporting. For further information on Nature Research policies, see our Editorial Policies and the Editorial Policy Checklist.

| For a  | ll statistical an   | alyses, confirm that the following items are present in the figure legend, table legend, main text, or Methods section.                                       |  |  |  |  |
|--|---|---|--|--|--|--|
| n/a  | a Confirmed   |   |  |  |  |  |
|  | The exact sample size (n) for each experimental group/condition, given as a discrete number and unit of measurement   |   |  |  |  |  |
|  | A statement on whether measurements were taken from distinct samples or whether the same sample was measured repeatedly   |   |  |  |  |  |
| x  | The statistical test(s) used AND whether they are one- or two-sided  Only common tests should be described solely by name; describe more complex techniques in the Methods section.   |   |  |  |  |  |
| x  | A description of all covariates tested  |   |  |  |  |  |
| x  | A description of any assumptions or corrections, such as tests of normality and adjustment for multiple comparisons   |   |  |  |  |  |
| ×  | A full description of the statistical parameters including central tendency (e.g. means) or other basic estimates (e.g. regression coefficient)  AND variation (e.g. standard deviation) or associated estimates of uncertainty (e.g. confidence intervals) |   |  |  |  |  |
| ×  | For null hypothesis testing, the test statistic (e.g. <i>F</i> , <i>t</i> , <i>r</i> ) with confidence intervals, effect sizes, degrees of freedom and <i>P</i> value noted <i>Give P values as exact values whenever suitable.</i>                         |   |  |  |  |  |
| x  | For Bayes   | ian analysis, information on the choice of priors and Markov chain Monte Carlo settings   |  |  |  |  |
| x  | For hierarchical and complex designs, identification of the appropriate level for tests and full reporting of outcomes  |   |  |  |  |  |
| Estimates of effect sizes (e.g. Cohen's <i>d</i> , Pearson's <i>r</i> ), indicating how they were calculated |   |   |  |  |  |  |
| Our web collection on <u>statistics for biologists</u> contains articles on many of the points above.        |   |   |  |  |  |  |
| Software and code  |   |   |  |  |  |  |
| Polic  | y information   | about <u>availability of computer code</u>  |  |  |  |  |
| Data collection  |   | SerialEM, TEM Tomography  |  |  |  |  |
| Data analysis  |   | IMOD, emClarity, UCSF Chimera, MotionCor2, Relion 3.1, PyMol, Coot, Phenix, LocScale, FDR   |  |  |  |  |
| Ear m  | nuccrinte utilizine   | a custom algorithms or coftware that are central to the recease but not yet described in published literature, coftware must be made available to editors and |  |  |  |  |

## Data

Policy information about availability of data

All manuscripts must include a <u>data availability statement</u>. This statement should provide the following information, where applicable:

reviewers. We strongly encourage code deposition in a community repository (e.g. GitHub). See the Nature Research guidelines for submitting code & software for further information.

- Accession codes, unique identifiers, or web links for publicly available datasets
- A list of figures that have associated raw data
- A description of any restrictions on data availability

All data are available from the corresponding author, Dr. Peijun Zhang (peijun.zhang@strubi.ox.ac.uk), upon request. The cryoEM density maps CA-SP1 hexamer from GagDelMAT8I assemblies in the absence and presence of IP6 and GagT8I VLPs were deposited in the EMDB under accession code EMD-11894, EMD-11899, and EMD-11897. The refined models were deposited in PDB under accession codes 7ASH and 7ASI, respectively. NC-RNA cryoEM map was deposited in EMDB under accession code EMD-12287.
