

Supplementary material

Supplemental table 1 Simplified Identification Method for Polyp Labeling during Endoscopy (SIMPLE) classification for small colorectal polyps [5].

| | Non-neoplastic features | | Neoplastic features | |
|-----------------|--------------------------|--|--------------------------|---|
| | Hyperplastic polyp | | SSA | Adenoma |
| Surface pattern | Round pit | | Open/dilated/(dark) pit | Not round structure: Oval Tubular Branched |
| Vessel pattern | None Isolated Lacy | | None Isolated Lacy | Thick vessels |
| Lesion border | Regular | | Irregular/indistinctive | Regular |

SSA, sessile serrated adenoma.

Supplementary material

Supplemental table 2. ADR, PDR, correct surveillance interval and correct polyp diagnosis for each endoscopist involved in the study.

| Endoscopist | Total patients | No of polyps | No of diminutive polyp | Unretrieved polyps (%) | ADR (%) | PDR (%) | Correct polyp diagnosis (%) | Correct surveillance interval – Diminutive polyps* (%) | Correct surveillance interval – Small polyps* (%) | % Polyps with high confidence diagnosis |
|-------------|----------------|--------------|------------------------|------------------------|---------|---------|-----------------------------|--|---|---|
