N/A: Not Available. The Roche cobas provides Ct values for both Target 1 (ORF1, detects SARS-CoV-2) and Target 2 (E gene, detects Sarbecovirus subgenus). If the cycle threshold reaches the maximum cycles without detection, a result of "Not Detected" for that target is returned. Persistent positive RT-PCR tests for case number 25 were from the Hologic platform and case number 31 had no positive RT-PCR tests while in Orlando; therefore, they are not in this table.
