

Supplementary material

**Figure S1.** Phytotoxic activity of *M. pulegium* leaves (II) EO against radical elongation of *S. lycopersicum* (A), *L. sativa* (B), *L. sativum* (C), *R. sativus* (D), *L. multiflorum* (E) and *P. oleracea* (F) 120 h after sowing. Results are the mean of three experiments  $\pm$  standard deviation.

**Figure S2.** Phytotoxic activity of *M. pulegium* leaves (II) EO against germination of *S. lycopersicum* (A), *L. sativa* (B), *L. sativum* (C), *R. sativus* (D), *L. multiflorum* (E) and *P. oleracea* (F) 120 h after sowing. Results are the mean of three experiments  $\pm$  standard deviation.
