Supplementary Figure 1

Proportion of physicians who agree with the statement (%)[†]

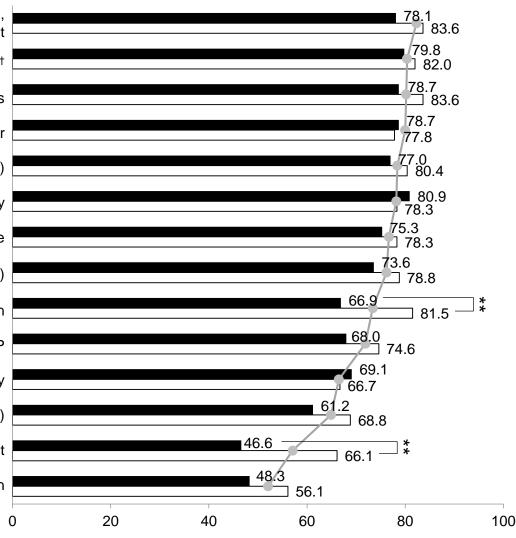

Male Female -Overall

Adherence to medication, and to not stop treatment based on self-judgement Reasons for treating hypertension and its associated complications^{††} Providing a target BP value and reasons for this Recommending or confirming ownership of a sphygmomanometer How to measure home BP (frequency, timing, etc.) Reducing salt intake with a target of <6 g salt/day Understanding that worsening of hypertension could affect your life Stopping smoking (including passive smoking) Efficacy and side effects of medication How to record values correctly when measuring home BP Exercising with a target duration of >30 min of aerobic exercise/day Maintaining weight (i.e. maintaining BMI <25)

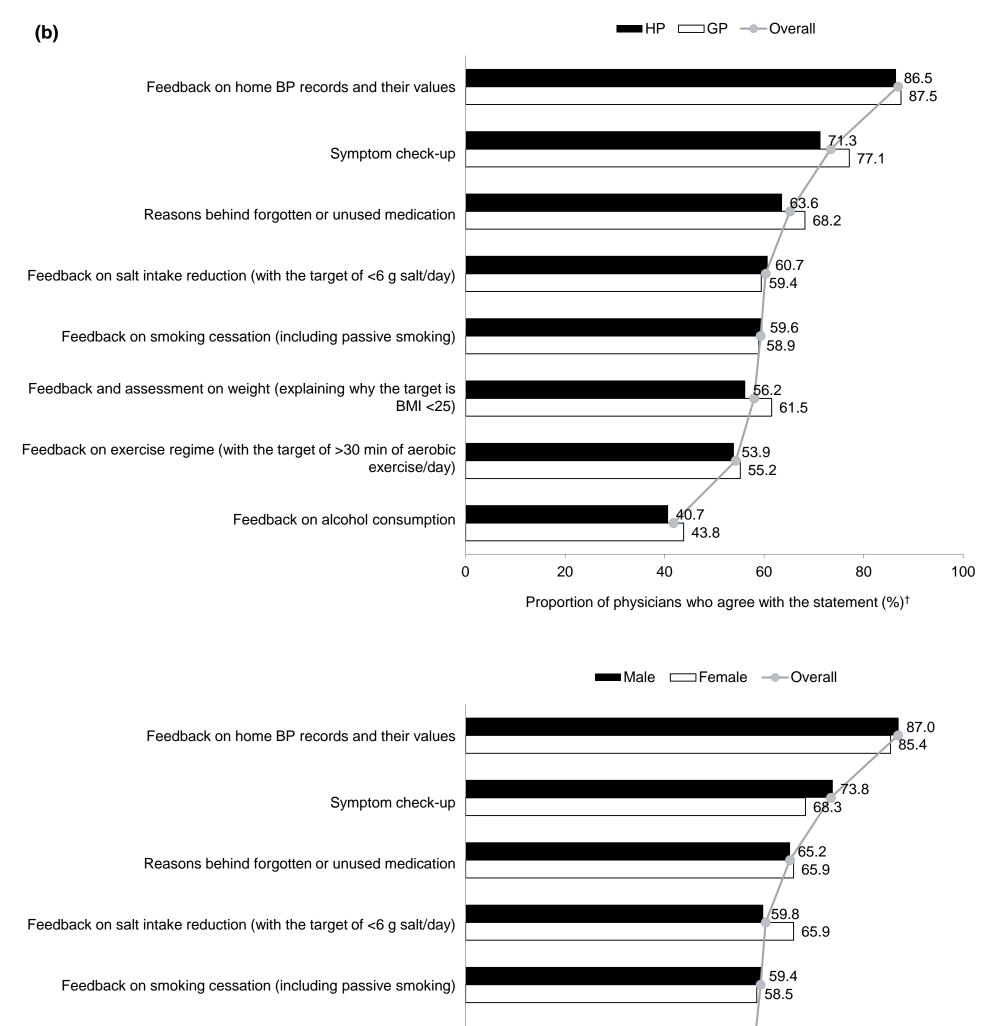

Proportion of physicians who agree with the statement (%)[†]

■Younger □Older --Overall

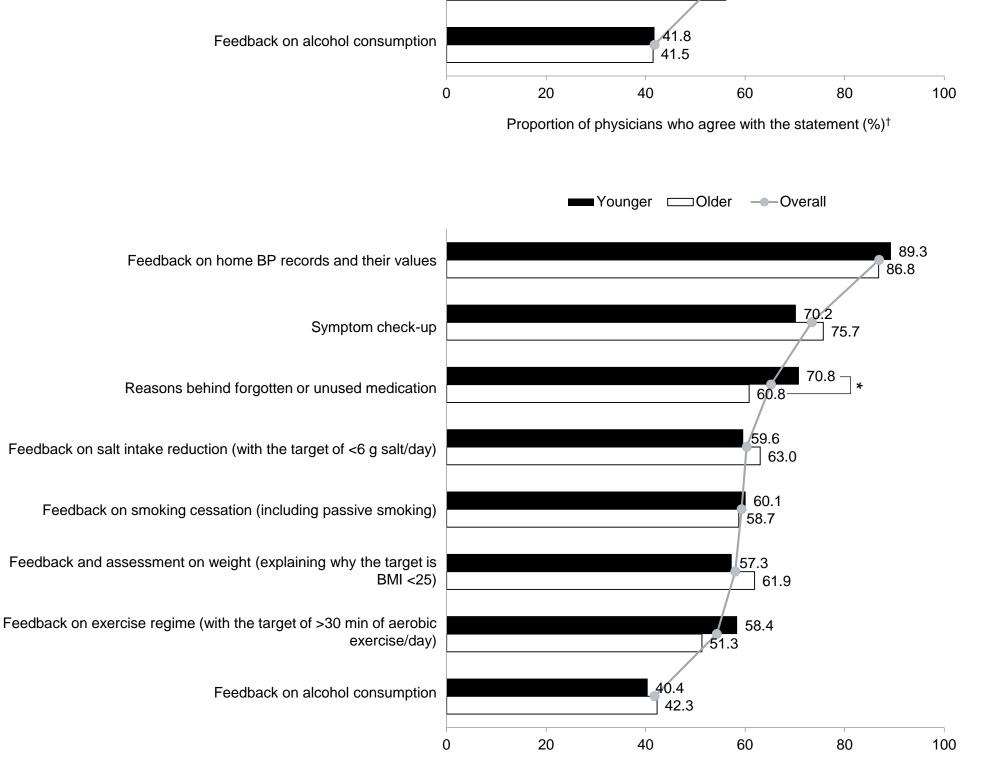

Adherence to medication, and to not stop treatment based on self-judgement Reasons for treating hypertension and its associated complications^{††} Providing a target BP value and reasons for this Recommending or confirming ownership of a sphygmomanometer How to measure home BP (frequency, timing, etc.) Reducing salt intake with a target of <6 g salt/day Understanding that worsening of hypertension could affect your life Stopping smoking (including passive smoking) Efficacy and side effects of medication How to record values correctly when measuring home BP Exercising with a target duration of >30 min of aerobic exercise/day Maintaining weight (i.e. maintaining BMI <25) Instructions for taking medication and what to do if you forget Decreasing alcohol consumption

Proportion of physicians who agree with the statement (%)[†]

Feedback and assessment on weight (explaining why the target is BMI <25)

Feedback on exercise regime (with the target of >30 min of aerobic exercise/day)

Proportion of physicians who agree with the statement (%)[†]
