

S3 Table: Expression of serum host protein biomarkers amongst study participants with TBM and stroke/no stroke at admission, and utility of individual serum host protein biomarkers in indicating stroke in TBM patients. The least square (LS) means (95% Confidence intervals) of all host markers and accuracies in the indication of stroke amongst children with TBM are shown. #reported in ng/ml, all other markers are reported in pg/ml.

Marker	TBM-stroke	TBM-no stroke	Not-TBM	P value ^a	P value ^b	P value ^c	Utility in indicating stroke in TBM patients			
							AUC (95% CI)	Cut-off value	Sensitivity %	Specificity %
