

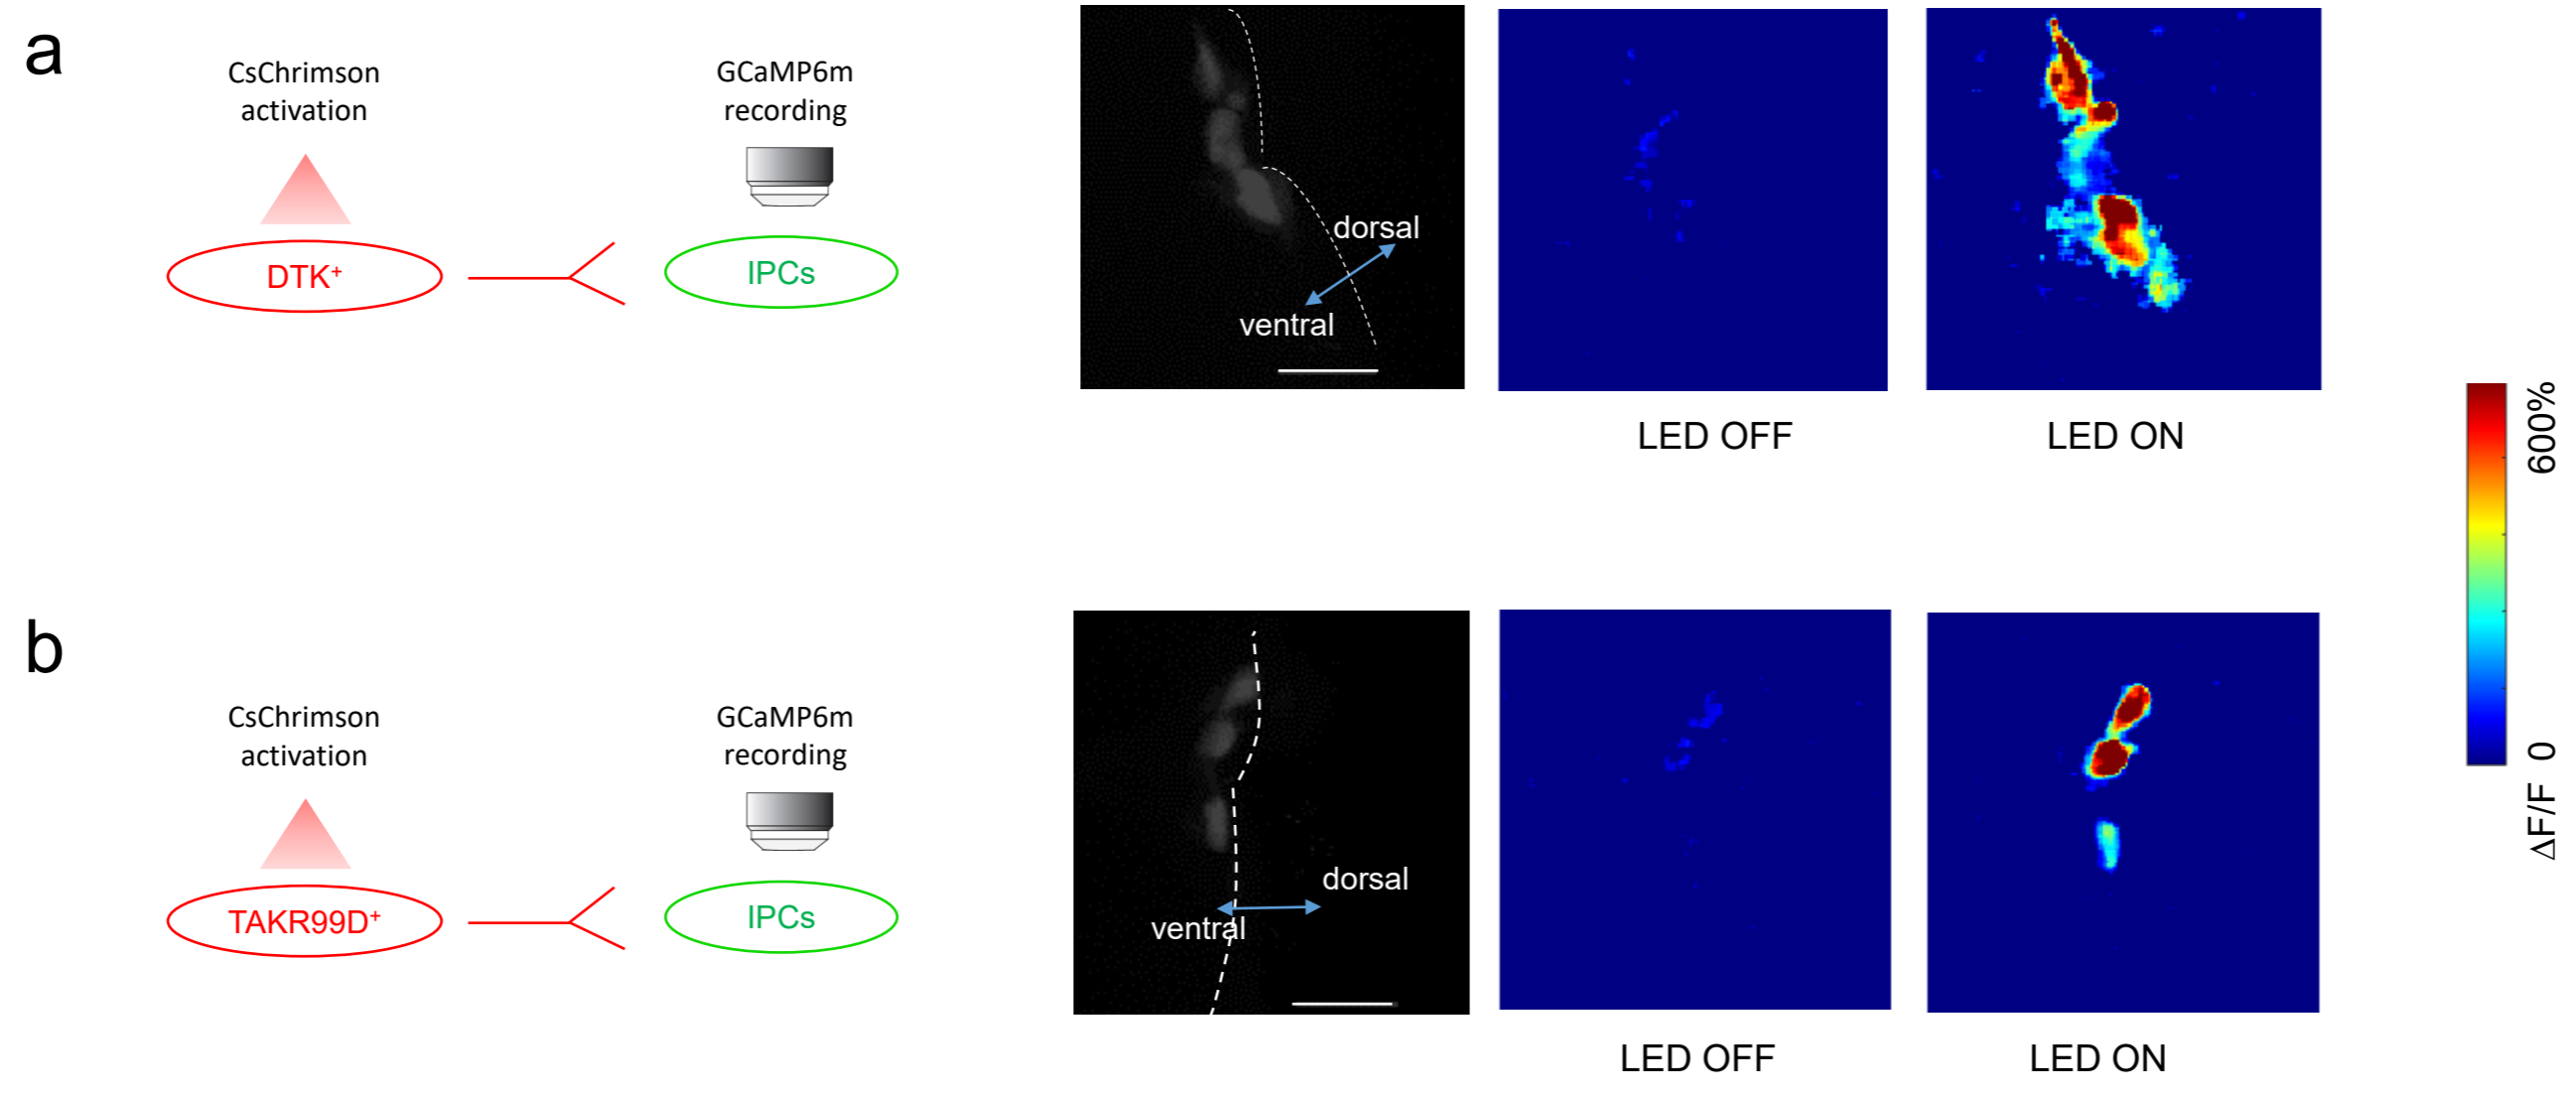

Fig S7

**Fig. S7 IPCs can be activated by the activation of DTK<sup>+</sup> and TAKR99D<sup>+</sup> neurons.**

**a** In the *ex vivo* calcium imaging preparations, the opto-activation of DTK<sup>+</sup> neurons elicited robust calcium responses in IPCs. **b** In the *ex vivo* calcium imaging preparations, the opto-activation of TAKR99D<sup>+</sup> neurons elicited robust calcium responses in IPCs.
