

**Supplementary Fig. 1.** Identification of the optimal cut-offs for T1-2N1M0 breast cancer in non-PMRT cohort using X-tile software.

**Supplementary Fig. 2.** Kaplan-Meier curves of overall survival between the PMRT cohort and control cohort for the entire group (A), low-risk group (B), moderate-risk group (C) and high-risk group (D) before PSM.

**Supplementary Table 1** Demographic and clinicopathologic features of patients between the control cohort and validation cohort in T1-2 breast cancer with 1-3 positive lymph nodes.
