

Haematologica
HAEMATOL/2020/262071
Version 4

Modulated expression of adhesion, migration and activation molecules
may predict the degree of response in chronic lymphocytic leukemia
patients treated with ibrutinib plus rituximab

Nadia Peragine, Maria Stefania De Propris, Stefania Intoppa, Maria
Laura Milani, Paola Mariglia, Francesca Romana Mauro, Sara Raponi,
Stefano Soddu, Antonio Cuneo, Gian Matteo Rigolin, Ilaria Del Giudice,
Robin Foà, and Anna Guarini

Disclosures: 'None'

Contributions: NP, RF, AG designed the research study; MSDP, SI, MLM, PM, SR carried
out the lab work, MSDP, FRM, SS, AC, GMR, IDG analyzed the data, NP, RF, AG wrote
the paper.
