

A**GFAP+ astrocytes****B****Cerebellar brain weight**

Supplementary Figure 1 Therapeutic treatment with fingolimod and teriflunomide reduces astrogliosis and leads to a trend towards mitigated cerebellar atrophy. (A) Representative immune fluorescence microscopy and quantification of GFAP+ astrocytes in optic nerves and (B) cerebellar brain weights of 7-month-old *Ppt1*^{+/+}, *Ppt1*^{-/-}, fingolimod-treated *Ppt1*^{-/-} (+ FTY720) and teriflunomide-treated *Ppt1*^{-/-} (+ Teriflunomide) mice ($n = 4$ mice per group, One-way ANOVA and Tukey's *post hoc* test). * $P < 0.05$, *** $P < 0.001$.
