

Figure S1. circUBAP2 expression was inhibited by miR-1244 overexpression, but was promoted by miR-1244 inhibition. ***P<0.001 vs. control. circUBAP2, circular RNA UBAP2; miR, microRNA.

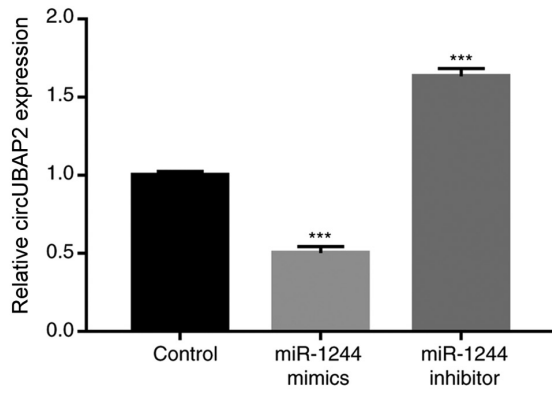

Figure S2. Transfection efficiency of miR-1244 mimics and inhibitor. (A) miR-1244 mimics significantly increased miR-1244 expression in all four PCa cell lines compared with NC. (B) miR-1244 inhibitor significantly decreased miR-1244 expression in all four PCa cell lines compared with NC. *** $P < 0.001$ vs. NC. miR, microRNA; PCa, prostate cancer; NC, negative control, untransfected cells.
