

Original image used to generate Figure S2 Panel A

Method used to capture the image: Digital camera through a filter for ethidium bromide gels

Samples: PCR products using indicated materials as a template.

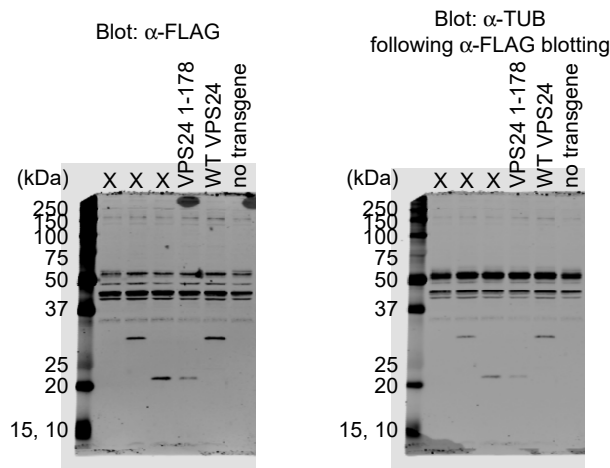

RT- : cDNA synthesis reaction without reverse transcriptase (RT).

Original images used to generate Figure 7 Panel A

Method used to capture the image: LI-COR OdysseyCLx imager

Samples: Whole fly lysate

Original images used to generate Figure 11 Panel B

Method used to capture the image: LI-COR OdysseyCLx imager

Samples: Lysate prepared from fly heads
