

iTreg conversion gating strategy (FOXP3 vs CD25 expression) used in the following figures:
 Figure 1C, 2B, 3C, 4A, 7A and Sup Figure 1B

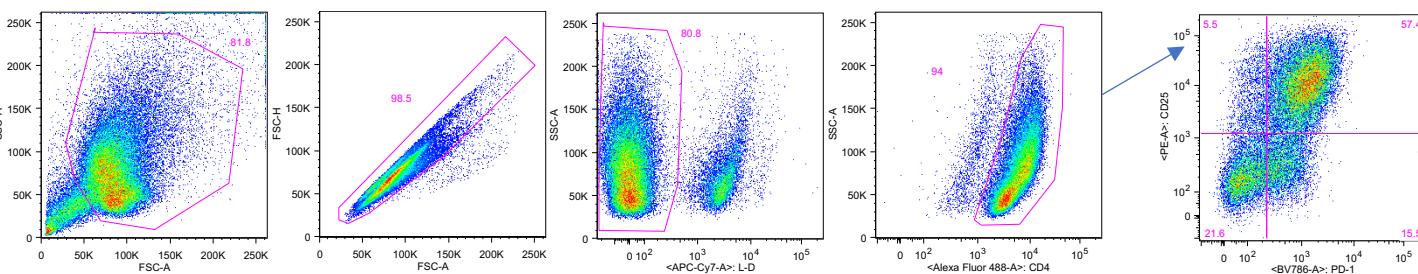

iTreg conversion gating strategy (CTLA-4 vs CD25 expression) used in the following figures:
 Sup Figure 1A and Sup Figure 1B (bottom panel)

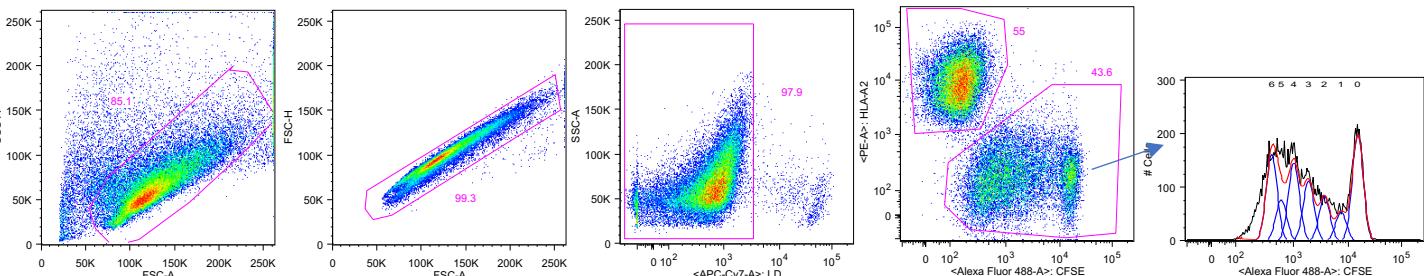

CTV gating strategy (FOXP3 vs CTV expression) used in Figure 2E

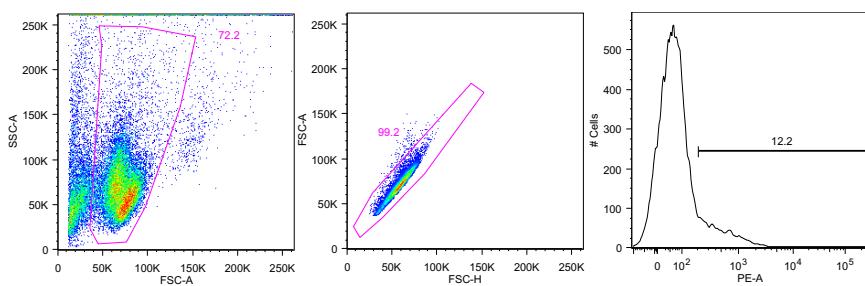

CRISPR/Cas9-PD-1 gene editing efficiency (CD25 vs PD-1 expression) gating strategy used in Figure 2A

Suppression assay gating strategy used in the following figures: Figure 2F and 3D

Phospho ERK ½ gating strategy used in the Figure 6A

Phospho AKT, STAT3 and STAT5 gating strategy used in the following figures: Figures 5D and 6E
