

Figure S5

Supplementary Figure 5: **Adherence of *B. suis* wild type (WT) and *B. suis* pBBR3xFLAG-*bmaB* to fibronectin.** Values correspond to the percentage of binding. A value of 100% was assigned to the wild type strain. Data represent the means and standard deviations (SD) of the results of a representative experiment done in triplicate. Three independent experiments were performed with similar results. Data were analyzed by one-way ANOVA followed by a Tukey's *post hoc* test. \*\*\*, significantly different from control ( $p < 0.0001$ ).
