

Figure S8

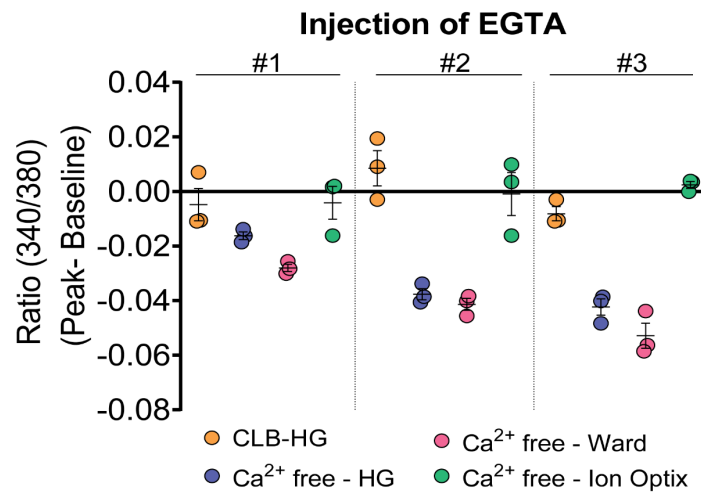

Figure S8: Addition of EGTA to Fura-2/AM and EGTA co-loaded cells chelates calcium in Ca²⁺-free-HG and Ca²⁺-free-Ward buffers. Cells co-loaded with Fura-2/AM and 10 μ M EGTA were stimulated with a further dose of 5.5 mM EGTA. Data shown as mean \pm S.E.M for three independent experiments with three replicates in each experiment.
