

Descriptions of Additional Supplementary Files

Supplementary Movie 1

Description: Live cell confocal videos that captured activated OT-1 cells (green) landed onto a layer of immobilized CellTrace Far Red dye labeled mRBC-CTRL cells (red).

Supplementary Movie 2

Description: Live cell confocal videos that captured activated OT-1 cells (green) landed onto a layer of immobilized mRBC-OVA-4-1BBL-IL-12 that were conjugated with DL650-labeled 4-1BBL protein (red).
