

Study Visit (Check one) : Baseline Visit 2 Visit 3

Recording Period (Check one): First 24-hour period Second 24-hour period Third 24-hour period

Example above has been enlarged to show that each tick mark represents a 5 minute interval

Date of First Recording
on this page:

___ / ___ / _____

CRYING/FUSSING

AWAKE & CONTENT

EVERYTHING ELSE (e.g.,
SLEEPING, EATING,
CANNOT REMEMBER)

MORNING

AFTERNOON

EVENING

NIGHT

Supplemental Figure: Each 24-h period was represented by four 6-h time bars (5 min subdivisions) corresponding to: morning (6:00 a.m. to noon), afternoon (noon to 6:00 p.m.), evening (6:00 p.m. to midnight), and night (midnight to 6:00 a.m.). Crying/fussing and awake & content behaviors were recorded in 5-min increments with parents encouraged to fill in the diary every 2 to 3 hours, or at the same time as a repetitive activity, such as feeding or changing a diaper.
