

Supplementary Figures

Supplementary Figure 1. $\delta^{13}\text{C}_{\text{MDE}}$ and $\delta^{15}\text{N}_{\text{MDE}}$ of modern non-subsistence populations (μ) with error bars (2σ) and grouped by continent, using the country groupings identified by **Hulsemann et al, (2015)**. Vegans and vegetarians are shown separately (in pink).

Supplementary Figure 2. $\delta^{13}\text{C}_{\text{MDE}}$ and $\delta^{15}\text{N}_{\text{MDE}}$ values of all individual modern subsistence (red) and non-subistence (grey) data points. Isotope values are reported relative to the international reference scales of AIR for nitrogen and Vienna PeeDee Belemnite (VPDB) for carbon.
